***Allowable Subject Matter***

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance: There is no teaching or suggestion in the prior art of the claimed combination having a linkage, operatively connected to the foot pedal and the plunger, for effecting movement of the plunger in the direction transverse to the path of movement in response to depression of the foot pedal, the relationship between the movement of the foot pedal and the responsive movement of the plunger being independent of the position of the carrier within the limited range; re claim 6, a plunger operator, operatively connected to the foot pedal and the plunger, for effecting movement of the plunger in the direction transverse to the path of movement in response to depression of the foot pedal, irrespective of the position of the carrier within the limited range; re claim 11, a plunger operator having a surface engageable with the plunger, the plunger operator being responsive to depression of the foot pedal for effecting movement of the plunger in the direction transverse to the path of movement, irrespective of the position of the carrier within the limited range; re claim 16, a foot pedal pivotally coupled to the carrier by way of the foot pedal support, wherein the foot pedal engages an upper surface of the transfer arm to actuate the transfer arm, and a control device that extends upward through the control device opening and includes a first ball mechanism, wherein a lower surface of the transfer arm engages the first ball mechanism to actuate the control device, and transfer arm includes a second ball mechanism on the upper surface to interface with the foot pedal.
